Bandung, west java

I am currently an undergraduate student, pursuing a major in Informatics engineering. I have a strong foundation in web development. I am skilled in creating dynamic websites using advanced libraries and frameworks such as React.js, and Tailwindcss. I also have experience in data fetching using Axios and employing state management tools like Redux, and React Context. Moreover, I have hands-on experience in full-stack development using Next.js, MySQL, PostgreSQL, Prisma ORM, and Firebase. I am proficient in version control using Git, and I am confident that my skills make me a well-prepared front-end developer.
